Automation & AI Intern (f/m)

Jutrzenki 105, 02-230 Warszawa, Polska

At Bosch, we shape the future by inventing high-quality technologies and services that spark enthusiasm and enrich people's lives. Our promise to our associates is rock-solid: we enjoy our work, we inspire each other, we provide equal growth opportunities for all team members, all roles are represented in all countries. We grow together!

We are seeking for a motivated and enthusiastic Intern to join our Hyperautomation team.

This internship provides an exciting opportunity to gain hands-on experience in understanding and optimizing internal processes while contributing to the development of frameworks for customer communication.

As a part of our dynamic team, you will work closely with various stakeholders to ensure seamless automation processes and effective communication strategies.

Key Responsibilities

- Support the team in building and testing automation solutions using low-code platforms (e.g., n8n, Microsoft Copilot Studio, ServiceNow, KNIME).
- Assist in running proof-of-concepts (PoCs) for AI/agent-based automation under the guidance of senior developers.
- Explore new AI and automation technologies (e.g., GenAI, agent frameworks, Model Context Protocol) and prepare short research notes or demos.
- Assist in conducting workshops with business stakeholders to understand their pain points, document manual processes, and translate them into technical automation requirements.
- Prepare user documentation and conduct training sessions to help non-technical users adopt new automation / AI tools.
- Help maintain automation platforms by contributing to basic DevOps tasks (CI/CD pipelines, monitoring, documentation).
- Document findings, prepare presentations, and contribute ideas to innovation discussions.

Profil:

* A 2-3rd year student of Computer Science, IT, or a related field.
* Availability for Internship tasks minimum 30h per week.
* Basic knowledge of Python or JavaScript/TypeScript.
* Interest in low-code platforms and automation (prior exposure to n8n, Power Automate, or ServiceNow is a plus).
* Curiosity about GenAI and modern AI agents; willingness to experiment and learn quickly.
* Familiarity with Git/GitHub and cloud basics (Azure/AWS/GCP) is a plus.
* Strong communication and teamwork skills, with the ability to document and share findings clearly.
* Strong presentation skills, with ability to confidently bridge technical developers and non-technical business partners
* Fluent both in Polish and English languages.
* Analytical skills to break down unstructured business tasks into logical step-by-step workflows.
* Mindset matters most: energy, eagerness to learn and explore cutting-edge automation and AI.

Benefits

* Paid internship based on a civil-law contract
* Hybrid work mode with the office in Warsaw
* Flexible working hours
* Gaining practical knowledge in the international company
* Substantive support from best experts
* Prepaid Lunch card
* Special conditions for the MultiSport Card* Płatny staż w oparciu o umowę zlecenia (minimum 6 miesięcy)
* Zdobywanie praktycznej wiedzy w międzynarodowej firmie
* Wsparcie merytoryczne ze strony specjalistów
* Karta LunchPass
* Rozwój w międzynarodowym środowisku
