Link to apply: <https://link.lionbridge.com/gameplaytester-warsaw-poland>

You know that moment when a game just feels... off?

Yeah — this is where those things matter.

About the project

You'll test FPS / shooter / battle royale games at different stages of development — including titles that are already released and actively updated.

You'll focus on gameplay, mechanics, balance, and overall player experience — checking how things work, how they feel, and what could be improved.

Your feedback directly helps refine updates and future changes. And no previous experience is needed — if you play, you already have a strong starting point.

New builds mean new sessions — and every now and then, a chance to jump in.
